

Amendments to the Abstract of Disclosure:

This will replace all prior versions of the Abstract of Disclosure in the application:

AI Use of a delta in cellular device occupancy in cells of a cellular communication system to estimate vehicular traffic flow on roadways connecting the cells. In one embodiment, the present invention includes an apparatus that includes a cellular map of the cells in a geographic area; a roadmap of vehicle roads in substantially the same area; and a traffic flow analyzer to determine vehicle traffic in at least a portion of the geographic area corresponding to the maps.
